French Artist, Prune Nourry has spent her working life exploring issues around the human body. At the tender age of 31, Prune is diagnosed with breast cancer. She starts documenting her treatment and its effect on her own body, turning her medical odyssey into an intimate artistic undertaking that leads her to find new meaning in her work and its serendipitous relationship to her own survival. Coincidence is striking and wonderful. Serendipity's theatrical release took place in October 2019 during Breast Cancer Awareness Month at the Mill Valley Film Festival in San Francisco, USA, followed by several releases across the US and France. Since the film's debut, it has received rave reviews worldwide, including in the New York Times, Variety, and the LA Times.
